The forests of Byrnah Ca-

lumbia differ according as

Forests are one of Canada's preatest resources. Over a quarter of a million Canadians are employed in the timber harvest and in the manufacture of forest products. The wages they earn, and the income that forest exports bring into the country, affect all levels of Canadian life. Forests touch all of our lives, whether we live in the cities, on the prairies, on small farms or in coastal outports.

From a base in British Columbia MacMillan Bloedel has grown to become Canada's largest forest products company and is a pioneer in many of the modern forestry practices that will assure a growing rescorce, healthy and undiminished for future senerations of Canadians. Recouse all Canadians share the benefits of this industry, we would like you to know how we feel about the forests we manage and what we are doing to protect and renew them. This is a brief report.
